

System Hierarchical Action Plan

Nota – Installment Management System

Note: Filtration is out of scope for this version. Search is included for clients and products only.

Epic	Story	Task
1) User Authentication	1.1) As a user I want to sign up and log in to the system securely	1.1.1) Create the database 1.1.2) Create a login page 1.1.3) Apply a validation mechanism 1.1.4) Create a pass key
2) Client Management	2.1) As a user I want to add, edit, delete, and see clients' data	2.1.1) Create a clients admin page 2.1.2) Connect the page to the database 2.1.3) Display recent client rows 2.1.4) Create add/edit/delete buttons
3) Product Management	3.1) As a user I want to add, edit, delete, and see products' data	3.1.1) Create a products admin page 3.1.2) Connect the page to the database 3.1.3) Display recent product rows 3.1.4) Create add/edit/delete buttons
4) Search	4.1) As a user I want to search for clients 4.2) As a user I want to search for products	4.1.1) Create client search mechanism 4.1.2) Display client search results 4.2.1) Create product search mechanism 4.2.2) Display product search results
5) User Balance	5.1) As a user I want to set my balance at sign-up and edit/top it up later	5.1.1) Add balance field to sign-up flow 5.1.2) Create balance edit/top-up page 5.1.3) Store balance in the database
6) Contract Management	6.1) As a user I want to add, edit, delete, and see contracts linking clients and products 6.2) As a user I want the system to check my balance before creating a contract	6.1.1) Create a contracts admin page 6.1.2) Connect the page to the database 6.1.3) Display recent contract rows 6.1.4) Create add/edit/delete buttons 6.2.1) Check user balance against contract amount before allowing creation 6.2.2) Block contract creation and show a message if balance is insufficient 6.2.3) Decrease balance by the contract's remaining amount on creation
7) Payments & Balance Tracking	7.1) As a user I want to record payments a client makes against a contract 7.2) As a user I want my balance to increase automatically when a payment is recorded	7.1.1) Create a payment entry form 7.1.2) Save payment records to the database 7.1.3) Allow the user to edit payment records 7.2.1) Increase user balance by the payment amount when recorded
8) Dashboard	8.1) As a user I want to see a dashboard summarizing the business	8.1.1) Calculate total clients, products, and contracts 8.1.2) Calculate sales, collected amount, and remaining amount 8.1.3) Calculate installments due today and overdue installments 8.1.4) Calculate monthly profit and expected amount 8.1.5) Build the dashboard UI
